

# **Protect communities and businesses from climate and nat cat events**

CelsiusPro advises public and private sector clients on inclusive climate and nat cat insurance schemes. For more than 500 clients, we executed more than 2000 assignments in more than 50 countries.

## About us

CelsiusPro is a Swiss InsurTech company. Since more than 10 years, CelsiusPro advises public and private sector clients on climate, weather and nat cat insurance schemes and how to best protect communities and businesses.

Our clients include governmental organizations, development organizations, consulting firms, re/insurance companies, brokers and businesses (SMEs, corporates and farmers).

We use big data for risk analysis and insurance product design. We provide our white label platforms to insurers and financial institutions to efficiently offer weather risk management products. The white label platforms are fully automated front to back solutions offering automated pricing, policy generation, policy lifecycle management and loss calculation.

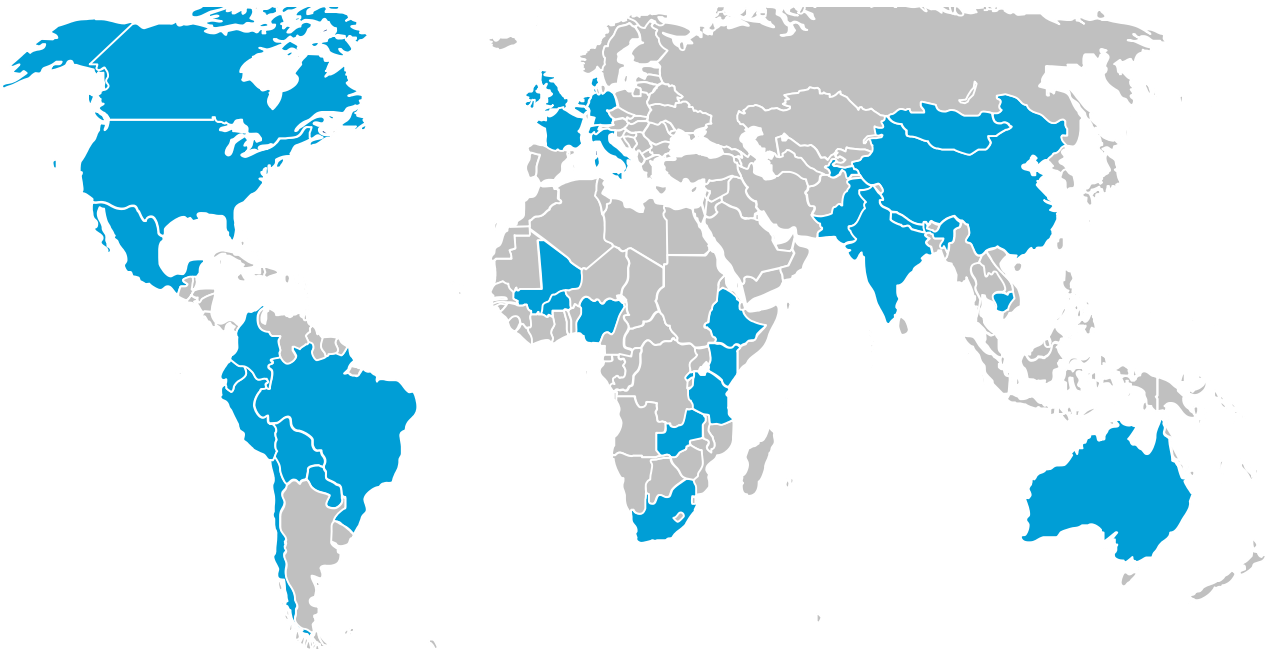

## Your added value

- + We provide solutions to protect all regions against drought, heavy rainfall, tropical cyclones and earthquakes. The insured community can recover much faster after a catastrophe.
- + Quick and straightforward implementation of national or regional climate insurance schemes thanks to our cutting-edge platform.
- + We have global weather and nat cat data at our fingertip thanks to CelsiusPro's Environmental Monitoring System.
- + CelsiusPro brings together all stakeholders, such as decision-makers, donors, policyholders, re/insurers and brokers.
- + Comprehensive and solution-oriented consultancy services for single risks, micro, meso and macro insurance schemes.

2000+ assignments

500+ clients

50+ countries

## CelsiusPro is a full-service provider for climate insurance

Our expertise allows us to cover the entire value chain from identifying the insurance gap, risk analysis, product design, pricing, distribution to education and risk transfer. Our consulting can include one or all of the following services

### 1 Feasibility studies and risk analysis

Environmental Monitoring System

- CelsiusPro's Environmental Monitoring System (EMS) offers all relevant weather and nat cat data worldwide
- Risk analysis and insurance demand assessment
- Design index insurance solutions
- Design low-cost distribution and administration model
- Capacity building and education
- Subsidy recommendations

### 2 Product development and underwriting

Risk modeling and pricing platform

- With CelsiusPro's pricing platform we design and recommend insurance options
- Correlate historical losses with climate variables
- Write policy wordings and terms and conditions
- Enable risk transfer with re/insurance companies

### 3 Implementation and administration

Insurance administration platform

- With CelsiusPro's white label platform you can manage large-scale, country wide insurance schemes
- Enable efficient and large-scale distribution
- Automated and errorless policy administration
- Education, user and sales workshops
- Calculation agent services
