

DevOps Engineer

80-100%

CelsiusPro AG is an Insurtech company based in Zurich specialized in industrializing index insurance solutions to mitigate the effects of adverse weather, climate change and natural catastrophes. We aim to increase resilience against Nat Cat and adverse weather events, combine risk management with data science, simplify, digitalize and automate the risk management process.

The Technology Team develops risk management solutions, modelling and analytics tools and web-based platforms. Our clients are corporations, insurers, brokers, governmental agencies, industry bodies, cooperatives and agribusiness companies. We are looking to recruit a DevOps Engineer to expand our capabilities.

You will be responsible for the following tasks:

- Develop and maintain mission-critical components in insurance lifecycle management systems, data collection, aggregation and analysis.
- Implement streaming data and algorithms
- Deploy updates and fixes
- Participate in architecture and software development activities
- Use open source technologies and tools to accomplish specific use cases encountered within the project.
- Use coding languages or scripting methodologies to solve a problem with a custom workflow.
- Collaborate with team members on the project to brainstorm about the best way to tackle a complex technological infrastructure, security, or development problem.
- Perform incremental testing actions on code, processes, and deployments to identify ways to streamline execution and minimize errors encountered.

You bring the following to CelsiusPro:

- A minimum of two years of relevant experience in Agile Software Development in C#, Python, Java, JavaScript and knowledge of best practices in IT operations.
- Familiarity with container orchestration services, especially Kubernetes and experience with docker.
- Experience administering and deploying development CI/CD tools such as Git, Jira, GitLab, or Jenkins
- Experienced in database technologies (relational/NoSQL)
- Significant experience with Windows and Linux operating system environments
- Excellent problem-solving and troubleshooting skills
- MSc degree in Computer Science, IT, IS, or equivalent area of technical study.
- Strong teamwork capabilities and excellent verbal written communication skills in English with a keen sense of customer service, German as a plus.

What we offer:

We offer a dynamic and international working environment linking climate change risks, index insurance, reinsurance and technologies. CelsiusPro are a data-driven, pragmatic, motivated, and talented young team. You will be exposed to a large diversity of tasks and to cutting edge technologies.

If you are looking for a new, exciting challenge, please send us your complete application including your cover letter and CV by email.

Candidates must have Swiss or EU citizenship or Swiss work permit.
